

SPRINGER®

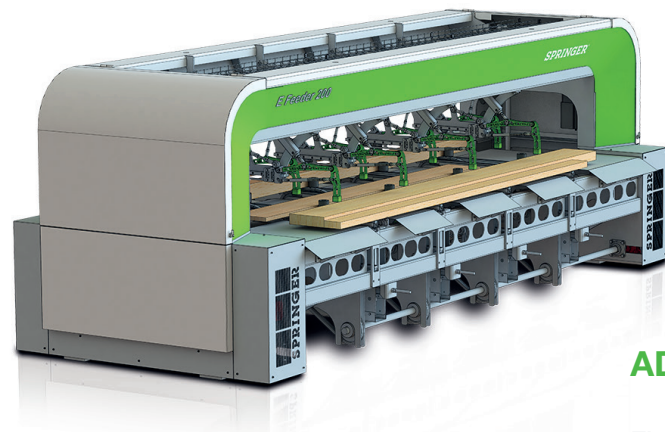

E-FEEDER 200*

The flexible feeder solution for lumber production

*Patent granted

E-FEEDER 200*

Flexible, fast, and precise

The E-Feeder 200 from SPRINGER is a material-friendly machine that can singulate multiple board dimension. It stands out as the fastest lumber feeder on the market and for its unbeatable high availability.

The E-Feeder 200 is a forward-looking and technologically advanced machine for mixed board dimensions. By means of a continuously controlled singulation process, not only can reliability be increased, but the efficiency of the entire mill is improved. The E-Feeder 200 is also characterized by low maintenance requirements and is easy to integrate into existing production lines.

ADVANTAGES:

Flexible

- Easy to integrate into existing lumber mills
- Minimum construction height
- Short installation time

Precise

- Allocation process that is gentle on surfaces and edges
- Guided acceleration of the boards during the whole feeding process
- Mixed dimensions can be reliably singulated together

Reliable

- High process reliability
- Material-friendly
- Increased efficiency
