HOLENS 2

Your communication at the next level!

HOLOLENS 2

Communication NEXT LEVEL – simple, efficient and location-independent

Improve collaboration and communication in your team with HoloLens 2, one of the most comfortable mixed reality devices on the market.

The “Helmet Version“ of HoloLens 2 creates an immersive virtual environment within the real world. The HoloLens wearer has both hands free during communication and is connected live with other users worldwide. This enables easy and efficient communication with teams in any location.

POSSIBLE APPLICATIONS:

- Customer support
- Remote support
- Field support
- Trainings
- Assistance during activating/shutdowns

The following actions can be carried out live and hands-free by the HoloLens wearer during communication and by the desktop users in the field of view of the HoloLens:

- Markings by arrows
- Markings by freehand drawing
- Data transfer and display in the HoloLens field of view
- Screenshots and video recordings
- Chat functions
- Full audio support

ADVANTAGES:

- Comfortable mixed reality device
- Simple, efficient communication with teams in any location
- Hands free communication
- Specially tailored for use in sawmill operations
- Integration of the HoloLens into your own Microsoft system
- No integration into customer internal systems necessary
- No new Sharepoints - OneDrive permissions required

CONTENTS OF THE HOLOLENS 2 PACKAGE

- 1x HoloLens 2 “Helmet Version”
- 12 months license for “Microsoft Remote Assist”
- Plug&Play: switch on HoloLens, set up Iris Recognition, and get started
- Employee training: maximum two appointments with approximately six people per device
